SKILLS

Data Structures and Algorithm

Android Development

Firebase Database

C language

C++ language

Python

MySQL

EDUCATION

Central University of Haryana

2021-25

B.Tech in Computer Science and Engineering

EXTRA CURRICULAR ACTIVITIES

College Techfest Main Member |

Mahendergarh, Haryana

02/2023

Led and managed a college techfest's coding competition, overseeing participation from diverse institutions.

HOBBIES

Reading Books , Cricket

PROFILE

As a versatile Android developer with a portfolio of 12 projects, including 2 major ones, I bring creativity and technical skills. Experienced in leading successful academic events, I excel in team environments. Proficient in data structures, algorithms (C, Java, C++, Python), and database management (MySQL, Firebase), I deliver impactful solutions.

INTERNSHIPS

Machine Learning Intern | Techgyan, IIT Bombay

06/2023 - 08/2023

During my internship at Techgyan, I developed a predictive model for IPL matches using machine learning algorithms and five years of historical data, enhancing my skills in data analysis, model development, and predictive analytics. I gained hands-on experience in Python, TensorFlow, Scikit-Learn, and data visualization tools.

Python Developer Intern | Codesoft

Enhanced Python skills by developing user-friendly GUI applications, including a Password Generator, To-Do List, and Calculator, demonstrating versatility and practical application of programming in real-world projects.

PROJECTS

Major Project (College App)

Developed a college app in Android Studio using Java and XML with CGPA calculation, real-time news feed, and Firebase backend for efficient data management and seamless user experience.

Minor Project

- Food Ordering App
- Stopwatch App
- Calculator App
- Weather App
